## (54) PICTURE DISPLAY SYSTEM FOR DISPLAY DEVICE AND TELEVISION RECEIVER

### (57)Abstract:

**PROBLEM TO BE SOLVED:** To provide a picture display system for a display device and a television receiver provided with a valid function which applies a comfortable audio-visual environment in the using environment when a meaningless video display state is present in the display of a television picture.

**SOLUTION:** A picture information compositing part 16 operates the composite processing of still picture information (digital picture information) as a wall paper held in a still picture information holding part 15 with the digital picture information of receiving television broadcast held in a broadcast picture information holding part 13. When the digital picture information of the receiving television broadcast held in the broadcast picture information holding part 13 is displayed on the display screen of a display device (CRT) 18, the still picture information (digital picture information) held in the still picture information holding part 15 is inputted into an area part in which the above mentioned digital picture information is not displayed on the pertinent display screen as the wall paper.
